

# Appin Road Upgrade Mt Gilead to Ambarvale Stage 1

Community Update | January 2025

---

Construction is continuing on Appin Road from Mt Gilead to Ambarvale (Stage 1).

As part of the new Figtree Hill community, we are delivering important safety upgrades to Appin Road in Campbelltown, between Ambarvale and Gilead.

In this community update you will see recently completed work, upcoming work activities, our work schedule, how we manage our impacts and any traffic changes that may impact you.

## What have we achieved?

- Completed 95% of vegetation clearing across the project.
- Completed 75% of the installation of the permanent koala fencing along Appin Road with the entire road works section fully fenced.
- Completed the interim intersection into Figtree Hill Estate
- Completion of bulk earthworks for the new northbound alignment
- Completed 75% of stormwater for new northbound alignment

## What's next?

- Continue the installation of permanent koala-proof fencing.
- Continue the construction of the koala underpasses at Browns Bush and Noorumba Reserve.
- Commence installation of kerbs and asphalt on new northbound carriageway
- Traffic switch onto new northbound carriageway
- Start the construction works for the new southbound road alignment

- Complete the installation of the new sewer main.
- continue with the utility investigation works including installation and relocation of utilities within the new road alignment.

## Our commitment to minimise disruption

We understand that construction can be disruptive, and we're committed to minimising impacts on the community. Here's how we're achieving that:

Our standard work hours are **7am to 6pm, Monday to Friday** and **8am to 1pm on Saturdays**.

To maintain safety for road users and workers, and to minimise the impact on the road network during peak travelling times, some of our works will need to be carried out at night.

Night works in the vicinity of residential properties will be undertaken between **7pm and 5am** for up to **three nights per week**, with only two consecutive nights and no more than **10 nights per month** near the same property.

We aim to manage our work to minimise impacts on the community and the environment. Our work may be noisy at times and we apologise for any inconvenience.

Where possible we minimise noise by:

- turning off machinery when not in use
- positioning equipment such as generators away from properties
- undertaking noise monitoring
- communicating over radio and hand signals.

## What will this mean for you?

During our night construction hours, we may use noisy machinery and equipment.

You may notice:

- workers, vehicles, traffic controllers, and signage.
- road/lane closures, detours, and reduced speed limits.

## Traffic Changes

During these works, there will be temporary traffic changes along a section of Appin Road to minimise impacts to traffic and ensure the safety of workers and road users.

These changes will include temporary lane closures and temporary speed limit reduction.

In addition, a planned traffic switch in late February will see traffic moved onto the new northbound carriageway to enable the upgrade of the existing Appin Road.

Electronic signage will advise road users of these changes. Please keep to the reduced speed limit and follow the directions of traffic controllers and signs. For the latest traffic updates, call **132 701**, visit **livetraffic.com** or download the **Live Traffic NSW App**.
