How to make your own paper lanterns at home
What you will need:
Coloured Paper, Scissors, Pencil, Ruler and Sticky Tape
Time needed
20mins

Step 1:

Select your paper, cut off a strip for your handle and fold the paper in half.
Step 2:

Draw a line down the side of the folded paper 1cm from the open edge. Mark every 1cm along this line, then draw lines from each mark straight to the folded edge.

Step 3:

Cut along the lines from the folded edge to the marked line. Make sure you cut through both layers of paper.

Step 4:

Bring the edges together in a cylinder. Tape the edges together at the top, middle, and bottom. Attach the handle by taping each end inside the lantern.

Hang it inside your bedroom or outside in the garden!
